

SUICIDE IN CHILDREN WORKSHOP

Suicidal behaviour in children 10 years and younger is a subject of growing concern for those who work with children. Suicidal thoughts and attempts in children have sometimes been overlooked, denied or ignored.

This workshop provides information and offers practical approaches for those working with children who are 10 years or younger and who may be at risk of suicide. Intervention approaches build on the skills taught in the Applied Suicide Intervention Skills Training (ASIST) as it applies to children.
